 - Analyze campaign effectiveness with detailed reports
 - Adjust strategies based on actionable insights

The background of the slide features a photograph of a group of people in a meeting, overlaid with a large, semi-transparent yellow triangle that points from the top-left towards the bottom-right. The text is centered within the yellow area.

Engagement models

One-off projects

Choose this model for highly specialized tasks that require unique expertise for a finite duration. Ideal for companies looking to achieve critical objectives without long-term commitments.

Each project follows a stringent timeline with milestones set from initiation to delivery, ensuring goals are met efficiently and effectively.

Retainer engagement

Ideal when you need recurring support, month on month, to drive your marketing strategy and deliver consistent results for your campaigns. When you are not looking to hire/onboard an expert but need long-term, continual support for your email marketing needs.

Applicable to all the services starting from email templates to campaigns to automation, we can help you through our retainer engagement model.

The background features a diagonal split between a light gray area on the top-left and a bright yellow area on the bottom-right. Faint, semi-transparent images of office environments, including people working at desks and modern interior spaces, are visible across the entire background.

**Dedicated resources and
teams**

Whether you want to hire one expert or build an entire team, this engagement model can prove advantageous for your business.

When you hire a dedicated resource or team, they work only on your project. Hire a resource when you want to cut hiring cost, or need a helping hand, or need an expert team to meet aggressive deadlines.

Why go for dedicated resources

- ❖ No hiring hassles
- ❖ Overcome the lack of right resources
- ❖ Access to right resource, at the right time, and right Price
- ❖ Low risk and greater predictability of the project outcomes
- ❖ Delegate & manage priorities on your own terms
- ❖ Scale up / down quickly
- ❖ Educate the resources as per your processes, practices, PMS, and tools.
- ❖ Complete ownership of the solutions developed
- ❖ Reduction of annual operating cost
- ❖ Faster turnaround time & increased productivity

Testimonials

GAMBiT

Wonderful collaboration. They are efficient (for last minutes changes for example) and reply fast to all queries. I highly recommend them

Ceruti, M.
